

Please download the pdf document in the resources section to view the emails you will need to investigate.

In your investigation of the emails, what signs did you find to indicate whether each email was malicious or safe? Give your opinion and analysis on these emails in this document, then upload it as your submission.

Email 1:

Is this email Safe or Malicious?	My Analysis
Safe	• No social engineering involved. • No call-to-action button.

Email 2:

Is this email Safe or Malicious?	My Analysis
Malicious	• There is a call-to-action button that seems a bit unprofessional. • The word “security” seems highlighted to trigger the psychology of the reader to trust the email. • Unnecessary words are highlighted which makes it seem unprofessional. • The name of the sender is also doesn’t seem like the ethical OneDrive customer support would have sent.

Email 3:

Is this email Safe or Malicious?	My Analysis
Malicious	• The “Facebook” in the link looks suspicious. • The top-level domain is not “com”, instead its “opt” which is an unlikely scenario to expect from the original Facebook login website.

Email 4:

Is this email Safe or Malicious?	My Analysis
Malicious	• The emails that the mails originated from are fake that are made to impersonate the original websites

Email 5:

Is this email Safe or Malicious?	My Analysis
Malicious	• FBI agent would never ask for a citizen's email since they might get them involved in their mess. • They won't try to send it through our email since we will get the access to those highly confidential information

Email 6:

Is this email Safe or Malicious?	My Analysis
Malicious	• The "C" in reubancorrigan@anz.com is supposed to be capital but the email it is sent t=it is capital. • The whole message looks unprofessional, with no proper punctuations.

Email 7:

Is this email Safe or Malicious?	My Analysis
Malicious	• The senders email looks very improper and it is not even slightly related to Mike Ferris. • The https protocol is not used. • The link has no proper top-level domain. • The link is still in php format which is unprofessional.
